

**Press Statement**

**Mumbai, September 26, 2023**

Mahindra & Mahindra would like to clarify with respect to an FIR that was filed on September 23, 2023. The case is over 18 months old, and the said incident happened in January 2022.

It was alleged that the vehicle did not have airbags. We would hence like to categorically reconfirm that the Scorpio S9 variant manufactured in 2020 did have airbags. We have investigated and there was no malfunction of the airbags. It was a rollover case which would not deploy the frontal airbags. A detailed technical investigation was completed by our teams in October 2022.

The matter is currently sub judice and we are committed to cooperating with the authorities for any further investigation that is required. We completely empathise with the family and offer our deepest condolences to them in their grief.
